

California Public Utilities Commission

MARCH 19, 2018

PUBLIC PARTICIPATION HEARING

CPUC to Hold Public Forums on Edison's Rate Request

The California Public Utilities Commission (CPUC) will hold public forums to provide an opportunity for customers of Southern California Edison to offer their perspective and input to the CPUC about the company's rate request.

This proceeding is referred to as Phase 2 of Edison's 2018 General Rate Case. The primary purpose of the proceeding is for Edison to assign revenues to its customers, and adjust rate designs to recover those revenues. While this proceeding will not increase or decrease overall revenues, residential customers will see an increase in rates if the changes proposed by Edison are adopted.

Learn more about the request at www.cpuc.ca.gov/PPH.

You can also submit comments in writing to public.advisor@cpuc.ca.gov, and please be sure to reference proceeding number **A.17-06-030**.

The CPUC regulates privately owned electric, natural gas, telecommunications, water, railroad, rail transit, and passenger transportation companies.

You Are Invited!

March 19, 2018

2 p.m. and 7 p.m.

Hope to see you there!
