

The City of Signal Hill will provide a quarterly update on the City's efforts to conserve water. The City's goal is to reduce the total water demand by 10% between July 2009 and June 2010 and beyond.

As of October 1, 2009, the City's water customers have reduced their water demand by 9.47% in the first quarter of Fiscal Year 2009-10 compared to the same timeframe of a three-year average benchmark. The City of Signal Hill Public Works/Water Department appreciates all of the efforts by the City's water customers for their outstanding commitment to water conservation and we would like to say, "Thank You".

Keep up the great work!!
